# How to serve better in any space.

-----  
Smart equipment specifier solutions.  
-----

# FIND THE PERFECT FIT.

## ConserveWell™ Utensil Holders

This environmentally friendly method of rinsing and protecting serving utensils against bacteria growth replaces perpetual-flow sinks. Holds serving utensils above 140°F, keeping them safe while saving water, energy and money. Drop-in and wall-mount models available with optional countdown timer.

## Remote Dispensing System

Keep large amounts of condiments on tap and out of sight; models for 1½ or 3 gallon pouches with fitment. Manually operated system simplifies high-volume dispensing; eliminates the hassle of a CO<sub>2</sub> driven dispenser. Dispenses 1 oz per stroke; adjustable in 1/8 oz increments.

## Food Warmers & Rethermalizers

Stainless steel, water-bath soup warmers are NSF listed rethermalizers – quickly heating food to safe serving temperature. Temperature-sensing thermostats provide accurate, even heat to maintain superior flavor and texture from first serving to last.

## SlimLine™ Dry Food & Candy Dispensers

Serve up consistent, accurate portions to help reduce waste and save money. SlimLine™ dry food and candy dispensers allow you to dispense up to four ingredients in less than 13" of wall space. Available in both wall-mounted and countertop options to fit your workflow.

# 4 SIMPLY SMART REASONS TO CHOOSE SERVER PRODUCTS

## 1) Worry-Free

Products arrive on time, undamaged and in working order.

## 2) Creative Solutions

We understand operator issues. Our proven expertise in engineering relevant dispensing solutions will help your customer satisfy patrons and boost the bottom line.

## 3) Crafted in the USA

We started in 1949 and today we're still made in the U.S.A. to help operators improve efficiency and reduce costs.

## 4) Two-Year Warranty

Our dependable products are backed by a Two-Year Warranty.
