87480  
MB-4

Effective May 19, 2014, the bill of materials for mini bar combinations will be changed. The current combo units include 87211 stainless steel lids and 87213 stainless steel ladles. Each combo (part #'s above) is being revised to remove the stainless steel lids and ladles and replace with 87253 hinged plastic lids and 85156 plastic spoons. The name is also being changed from "Mini Bar" to "Mini Station".

Only 87211 stainless steel lids were available when the combos were created. Since then, the 87253 hinged plastic lid is much more popular. Similarly, operators have found the 85156 spoon easier to use in the  $\frac{1}{9}$  jar than the 87213 ladle.

With this change is a price reduction, effective immediately:

Part #	Description	Old List Price	New List Price
87470	MB-2	\$243.00	\$219.00
87290	MB-3	\$310.00	\$279.00
87480	MB-4	\$374.00	\$339.00

If specific customers in your territory have repeatedly ordered a mini bar combo, we will be in touch with you to discuss a notification process. However, all components of the original spec are still available and can be ordered separately.
