

# NEW PRODUCT UPDATE BULLETIN

April 14, 2017

## DISCONTINUED KNOB O-RING

As Server pursues continuous improvement on existing products, one goal is the elimination of parts to ease cleaning and create cost reduction opportunities.

One such change was eliminating an o-ring that was part of a stainless steel pump or fountain jar lid **knob**. Many of our pumps continue to need and use o-rings, but not the specific o-ring used on this knob.

Effective April 28, 2017, we will no longer stock the 82035 o-ring. A new variation of our stainless steel pump knob eliminates the need for this piece. For those who currently use the knob with the o-ring inset, the lack of the o-ring does not negatively effect the pump's ability to dispense properly.

If you have any questions regarding this change, please contact Customer Service at [spsales@server-products.com](mailto:spsales@server-products.com)

**Knob with 82035 o-ring inset**

**Flat knob**
