

DROP-IN CONSERVEWELL ADAPTER

Drop-In ConserveWell™ is designed to easily replace most existing perpetual flow dipperwells. There is one specific model dipperwell from T&S (B-2282) that could require a professional installer to modify the stainless steel table, but to avoid that additional expense, Server Products developed an Adapter plate (p/n 87728) that allows DI ConserveWell model 87770 to be easily installed over the [T&S model B-2282](#).

The Adapter plate (p/n 87728) designed to create a proper mounting area for the ConserveWell DI will be available by December 16, 2016. The Adapter is \$88.00 plus authorized dealer mark-up and includes an instruction sheet.
