

## DROP-IN CONSERVEWELL ADAPTER

Drop-In ConserveWell™ is designed to easily replace most existing perpetual flow dipperwells. One T&S model dipperwell (B-2282) may require a professional installer to modify the stainless steel table, but to avoid the additional expense, Server Products developed an Adapter plate (p/n 87728) that allows ConserveWell DI model 87770 to be easily installed over the [T&S model B-2282](#).

The Adapter plate (p/n 87728) was designed to create a proper mounting area for the ConserveWell DI.
