

NEW PRODUCT UPDATE BULLETIN

December 27, 2016

DISCONTINUED BLACK KETTLES AND 12X20 WARMER

Effective immediately, Server Products will be discontinuing all models of the black Kettle Server and FS-20SS 12x20 Supreme™ warmers.

Discontinued Kettle Server part numbers include: 84300 and 84290 (domestic models) 84350, 84330, and 85540 (international models).

Discontinued 12x20 Supreme™ part numbers include: 90020, 90160, and 90080.

If you are using any of these models and should need a replacement, we suggest the FS-7 or FS-11 as an alternative for the Kettle Server, and the IntelliServ™ or Twin FS-4 Plus for the Supreme™.

Each alternative warmer is NSF listed as a rethermalizer and thermostatically controlled for precise holding. The FS-7, FS-11 and Twin FS-4 feature a moisture conserving, hinged lid that stays upright while serving and returns moisture to food to retain flavor.

Twin FS-4 food vessels hold 5 quarts each while the discontinued (90080) version of FS-20SS holds 7 quarts per pot. The Twin FS-4 is ideal for higher volume operations, while those with lower volume may want to consider the IntelliServ™.

Discontinued Kettle Server
KS-2 84300

Discontinued Supreme™ models
FS-20SS 90080 and 90020

Instead, consider:

FS-7 Food Warmer
84000

FS-11 Food Warmer
84100

Instead, consider:

Twin FS-4 Plus
81200

IntelliServ™
