November 18, 2016

## DISCONTINUED "DUCKBILL" EXPRESS PUMP MODEL

Effective December 31, 2016, or earlier if available parts are depleted, Server Products will be discontinuing the past generation of the Express pump (part # 07537) and all unique associated components.

Discontinued parts include: (07537) complete Express pump, (07454) discharge fitting, (07802) pump housing, and (07803) pump dome. Two parts used in this past Express model, the (07089) plastic tube and (07381) connector, are still compatible with current models.

If you are currently using the (07537) duckbill Express pump and should need parts, we recommend purchasing the replacement pump (part # 07794). This pump immediately adapts to any Server Express dispenser.
