Server Cream Servers

## Tips and tricks to help you get started with your new Cream Server.

1 Remove unit from box and wash all parts properly before use. See separate pump guide for pump instructions.
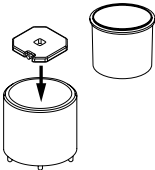

2 Pre-freeze ice pack(s) for about 12 hours prior to use. Pre-freeze ColdHold jars upside down for about 8 hours prior to use.

3 Insert one ice pack or HoldCold jar into shroud or base. Keep other ice pack or ColdHold jar in freezer to be ready for future use.

4 If using ice packs, install stainless steel jar into shroud or base after ice pack is installed.
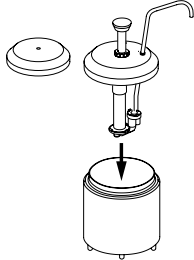

**5** Pour product into stainless steel jar or HoldCold jar.

⚠ Monitor temperature of product and maintain a temperature of 40°F or below to prevent product from becoming hazardous.

Ice pack can hold to proper temperature for up to 4 hours. ColdHold jars can hold proper temperature for up to 12 hours.
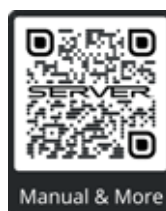

6 Install lid or pump.

7 Assembled units.
