

QUICK START GUIDE

# Server Signature Touch™ Squeeze Bottle Warmer

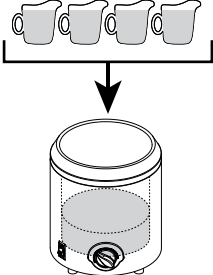

Tips and tricks to help you get started with your new squeeze bottle warmer.

**1** Remove unit from box. Clean, rinse, sanitize, and air dry all parts.

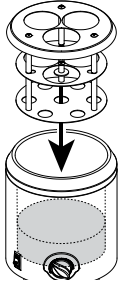

Never immerse complete unit into water. Electrical shock could occur. Be aware of the product you are serving and the temperature the product is required to maintain.

**2** Fill water vessel basin with 4-6 cups (946-1420mL) of water. Do not overfill. Check water levels throughout the holding period to ensure even heating. Filtered water is recommended to deter corrosion.

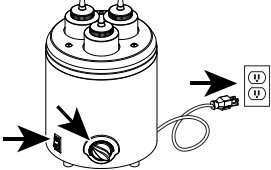

**3** Insert bottle support in water vessel basin.

**4** Fill bottles with desired product. Insert bottles into support openings.

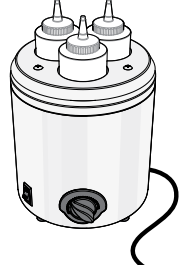

**5** Plug in cord. Press switch to the "ON" position. Set the thermostat knob. Do not exceed 125° F (52° C). Pull knob out to turn and adjust temperature. Push knob in to lock.

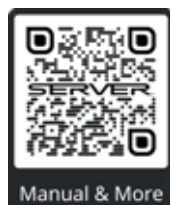

**6** Allow unit to cool before cleaning.

Clean external surfaces daily with a clean damp cloth. Dry with clean soft cloth. Glass and surface cleaners approved for use in food contact areas may be used.
