

The Packet Problem

Packets start to pile up when you compare them to pouches. Think of the packaging and product waste every time we grab a handful of packets. No pouch = ouch.

The Smart Solution

Packets are going the way of the phone book. You don't need hundreds of them when a single pouch provides a profitable alternative with less waste and more cost control.

Sustainability

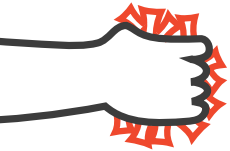

640 non-compostable packets

1 pouch; designed for recycling

Cost Control

Avoid unnecessary overserving of ketchup packets by patrons and employees. No need for handfuls of packets when Touchless Express™ Dispensers provide precise portions.

It takes

over 3 ketchup packets

to equal one full portion from Touchless Express™ Dispensers.
