

Tool & Die Maker

The Tool & Die Maker is responsible for performing various duties including analyzing specifications, layout of metal stock, set up and operation of machine tools, and fit and assemble parts to make and repair dies, gauges, jigs, fixtures and machinist's hand tools. Work is relatively independent and across the various areas within the department as assigned.

Located in Richfield, Wisconsin, Server Products, Inc. is one of the world's leading manufacturers of innovative products for the restaurant and foodservice markets. Our portfolio includes a breadth of industry-leading food warmers, dry food dispensers, condiment and syrup pumps and other energy and water saving solutions for the foodservice industry. Check us out at www.server-products.com.

We intend to be the best not only in terms of our products, but also in the relationship with our employees. We wish to provide a safe, clean, friendly and challenging work environment in which employees can enjoy their jobs, take pride in their work, and grow to their maximum potential.

If you're up to a new challenge, here's what you'll be responsible for:

- Plan, lay out and perform all bench and machine operations to construct, alter and repair tools, dies, fixtures, molds, gauges, etc. requiring considerable skill and general knowledge of tooling practice and applications.
- Lay out work and plan machining operations.
- Perform machine set-ups and operations involving the improvising of tooling and machines for unusual adaptations.
- Occasionally do development and experimental work.
- Assume responsibility for quality workmanship and dimensional accuracy.
- Helps to resolve fabrication and assembly problems
- Use blueprints, sketches, models, or specifications to create prototypes and tooling for fabricating tools, dies, or assemblies.
- Experience in set up and operation of conventional or computer numerically controlled machine tools such as brake press, spot welding, lathes, milling machines, and grinders to cut, bore, grind, or otherwise shape parts to prescribed dimensions and finishes.
- Participate in test runs with completed tools or dies to ensure that parts meet specifications; adjust as necessary.

In return, we look for you to bring:

Education & Experience

- Apprenticeship training and Journeyman status or equivalent education and experience preferred.
- Minimum of 2 years tool and die experience within a manufacturing environment.

Skills & Abilities

- Knowledge of the practical application of engineering science and technology. This includes applying principles, techniques, procedures, and equipment to the design and production of various goods and services.
- Knowledge of machines and tools, including their designs, uses, repair, and maintenance.
- Prototyping and exposure to manufacturing sheet metal operations/fabrication.
- Knowledge of raw materials, production processes, quality control, costs, and other techniques for maximizing the effective manufacture and distribution of goods.
- Good written and verbal communication skills.

We provide competitive compensation and benefits plus profit share. If interested, please submit a cover letter that includes salary requirements to careers@server-products.com. Server Products is an Equal Opportunity Employer.
