Topping Warmers Single and Twin Merchandisers

SPECIFICATION SHEET

FAST FACTS

EZ-Topper® Warmers serve up to 98% of fudge or caramel topping from either 48 or 96 oz pouches with a 16 mm center fitment in a 1 oz max serving that can be reduced in 1/8 oz increments

APPLICATIONS

- Ideal for self-serve dessert stations as tamper-resistant packaging brings peace of mind
- High-volume operations looking to optimize downtime during changeouts
- Lower-volume or sporadic-use operations serving topping over an extended period of time

DETAILS

- Promote dessert consistency with portion control; 1 oz pump serving is adjustable in 1/8 oz increments
- Dispense more servings with eco-friendly pouched topping dispensers; deliver up to 98% evacuation and create 97% less packaging waste than cans
- Minimize downtime during changeouts – twin models dispense from one pouch while pre-heating a second in reserve

Sealed, sanitary system keeps topping safe and avoids product degradation; containment simplifies cleanup by keeping pump exterior clean

EZ-Topper® Warmers use either 48 or 96 oz topping pouches with a 16-mm center fitment, packaged by:
- Ghirardelli® Chocolate Company
- Lyons Magnus
- Masterson Company

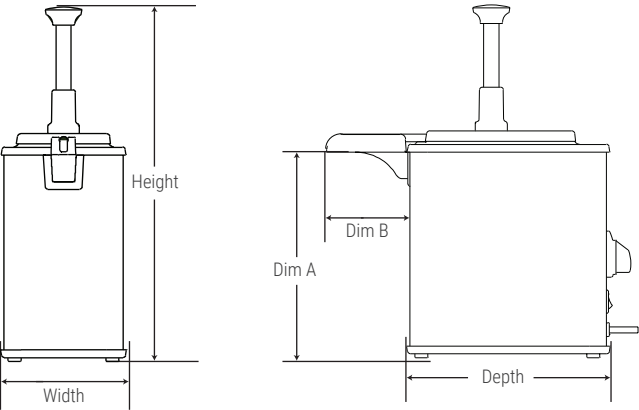

Adjustable thermostat heats and holds temperature as topping depletes to avoid scorching

Purposefully made to last.

EZ-TOPPER® POUCHED TOPPING WARMER MODELS: EZT, EZT-S, & EZT 96 OZ

Server EZ-Topper® Warmers accept either 48 or 96 oz topping pouches with 16 mm center fitment and are available with and without room to pre-heat a reserve pouch. Twin warmers use individual temperature sensing thermostats to control wrap-around heating elements for accurate heating and holding. Temperatures range from 100°F to 200°F. Pumps dispense 1 oz max stroke adjustable in 1⁄8 oz increments. Black knobs standard; units include black engraved replacement knobs reading Caramel and Fudge. 72" electrical cord standard. NSF listed. C-UL-US listed. Two-year warranty.

Radiant heat from the vessel warms the heater block to keep toppings warm during slow periods

Pouch and fitment create sealed, sanitary system without the mess

Up to 98% product evacuation & 97% less packaging waste with pouches

Dispense from one pouch while pre-heating a second in reserve (shown without reserve pouch); low-profile models eliminate space for pre-heating
