CONSISTENT PORTIONS—SERVE BETTER

## **ECO PUMP™ PARTS**

# **SAFETY**

According to food and safety regulations, most foods must be stored and/or served at certain temperatures or they could become hazardous. Check with local food and safety regulators for specific guidelines.

Be aware of the product you are serving and the temperature the product is required to maintain. Server Products, Inc. cannot be responsible for the serving of potentially hazardous product.

### **IMPORTANT**

Clean, rinse, sanitize, and dry parts daily or regularly to comply with local sanitization requirements.

NSF International lists this pump as: "Not acceptable for dispensing potentially hazardous foods."

 Place lower end of pump into 1 cup (.24 L) of hot tap water (approximately 110°F/43°C) and pump until all tap water is expelled.

# **CARE OF STAINLESS STEEL**

# This durable pump includes stainless steel components.

If you notice corrosion beginning on any stainless steel surface, you may need to change the cleansing agent, sanitizing agent, or the cleaning procedures you are using.

 A mildly abrasive nylon or brass brush may be used to remove any stubborn deposits.

- Fully rinsing and drying all parts can help prevent corrosion. Elements and minerals in tap water can accumulate on stainless steel parts and create corrosion.
- Do not use abrasive, caustic or ammonia based cleansers.
- Do not use products containing acids, alkalines, chlorine, or salt. These agents can corrode stainless steel.
- Do not use metal scrapers or cleaning pads that could scratch surfaces.

# ASSEMBLY PRACTICE SAFETY. WASH ALL PARTS PROPERLY BEFORE USE. See page 4.

**INSTALL O-RING** 

into seal.

Apply food equipment lubricant on O-ring

**INSTALL SEAL**
