YES!

Use dishwashing soap and hot water

- External surfaces may be wiped clean with a clean damp cloth.
- Glass and surface cleaners approved for use in food contact areas may be used.
- Do not use abrasive, caustic or ammonia based cleansers.
- Do not use metal scrapers or cleaning pads that could scratch surfaces.

CARE OF STAINLESS STEEL

This unit is constructed with stainless steel— one of the best materials for food serving and storage.

If you notice corrosion beginning on any stainless steel surface, you may need to change the cleansing agent, sanitizing agent, or the cleaning procedures you are using.

- A mildly abrasive nylon or brass brush may be used to remove any stubborn food or mineral deposits on interior surfaces of unit.
- Fully rinsing and drying all parts can help prevent corrosion. Elements and minerals in tap water can accumulate on stainless steel parts and create corrosion.
- Do not use products containing acids, alkalines, chlorine, or salt. These agents can corrode stainless steel.

TROUBLESHOOTING

DIFFICULT TO ATTACH PARTS?

- Wet parts with clean water to help fit.

PRODUCT DOESN'T PUMP?

- Ensure pinch valve is inserted in housing.
- Ensure connector is snapped fully in place to fitment in pouch.
- Ensure pump is properly attached to pouch.
- Clean pump thoroughly.
- Ensure pump is properly installed into retaining slots inside front wall of shroud.

DOMES POPS OFF?

- Clean thoroughly. Food residue could prevent a tight seal between dome and housing.
- Ensure dome edges are flush with housing.
