TOUCHLESS SENSOR DIVIDER KITS (FOR MODELS SE-3-T, SE-3-TDI, SE-5-T & SE-5-TDI)

Touchless Sensor Dividers (100580) can be used to minimize the chance of patrons mistakenly activating a sensor with an arm or purse when when trying to activate a different sensor.

1. Remove divider(s) from box.
2. For triples, there will be one divider. For quintuples, there will be two dividers.
3. For triples, place the divider over the middle (2nd) sensor. For the quintuple, place the dividers over the 2nd and 4th sensor. Dividers will secure to the desired location with the affixed magnet at the base of the dividers and there is a cut-out in the dividers for the discharge tube to help with placement location.

Touchless Sensor Dividers can be wiped clean but do not submerge in water or clean in the warewasher.
