

# Discontinued Chiller Parts

## Update Bulletin

---

In 2017, we unfortunately had to discontinue our line of thermoelectric chillers for both domestic and international markets.

As of 12/31/2019, we will no longer be able to provide support on the Chiller warranty, service or components. We will do our best to have parts available until 12/31/2019; however, parts will only be available on a first come, first serve basis until depleted.

Though not a direct alternative to thermoelectric cooling, we offer a variety of equipment that utilizes either HoldCold™ Jars or eutectic ice packs. The eutectic material of HoldCold™ Jars holds food cold for up to 12 hours – simply place the jar in the freezer to refreeze. Eutectic ice packs stay frozen inside insulated units for up to 4 hours.

If you have any questions or would like more information on alternative chilling methods, please contact Customer Service.
