

SAVE WATER. SERVE BETTER.

CONSERVEWELL™ UTENSIL HOLDER

Holds serving utensils above 60°C, keeping them safe against bacteria growth - environmentally smart and economically sound alternative to traditional perpetual-flow dipper wells

Available with or without programmable countdown timer, which helps ensure timely water changeouts

Drops into most existing counter cut-outs for perpetual flow dipper wells

1.8 meter, 230V power cord allows for above or below counter plug-in

Cool touch thermal composite material safeguards servers

Includes (1) stainless steel inset; finger indents at sides make inset refills or cleaning quick and easy

CONSERVEWELL™
Model CW-DI

Application

- Replace a traditional dipper well perpetual-flow sink to save water, energy and money
- Drop into a serving station to keep utensils clean and handy

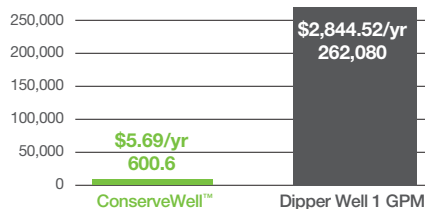

Fast Facts

Environmentally friendly method of rinsing and protecting utensils against bacteria growth versus traditional dipper wells; one unit can save over 250,000 gallons of water per year.

The ConserveWell™ keeps serving utensils above 60°C, keeping them safe while saving water, energy and money.

Unit drops into most existing counter cut-outs for perpetual flow dipper wells. Features a cool touch material for easy handling.

GALLONS PER YEAR*

*52 weeks at 7 days per week at 12 hours per day.
Average water and sewer rate of \$9.48 per 1,000 gal.
